Conventions

The following conventions are used in this manual:

Screen messages	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

Preface

Before using this information and the product it supports, please read the following general information.

1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Specifications

Features

This computer was designed with the user in mind. Here are just a few of its many features:

Performance

- Intel® Pentium™ III or Intel® Celeron™ processor with one-die level 2 cache
- 128 MB memory onboard and one memory upgrade slot
- Large LCD display with adjustable video memory
- High-capacity, Enhanced-IDE hard disk
- Lithium-Ion main battery pack
- Power management system
- DualView capability
- Simultaneous LCD and CRT display

Display

- 14.1" Thin-Film Transistor (TFT) liquid-crystal display (LCD) displaying 16.7 million colors at 1024X768 eXtended Graphics Array (XGA) resolution -or- 15.0" TFT LCD displaying 16.7 million colors at 1400X1050 Super eXtended Graphics Array Plus (SXGA+) resolution
- AGP 4X support
- Video memory allocation from main memory (BIOS)
- Simultaneous LCD and CRT display

Multimedia

- 16-bit high-fidelity stereo audio with 3-D sound
- Built-in dual stereo speakers
- Internal optical drive (CD-ROM, DVD-ROM, or DVD/CD-RW combo)
- Audio DJ (CD playback) feature
- S-video (NTSC/PAL) output

Connectivity

- High-speed 56Kbps V.90 fax/data software modem
- Ethernet/Fast Ethernet (10/100 Mbps)
- CarBus PC Card slots
- Universal Serial Bus (USB) ports
- IEEE 1394 port

Human-centric design and ergonomics

- All-in-one design (CD or DVD, floppy drive, and hard disk)
- Sleek, smooth and stylish design
- Full-sized keyboard
- Wide and curved palm rest
- Ergonomically-centered touchpad pointing device
- Launch keys (supports Audio DJ feature)

Expansion

- Upgradeable memory and hard disk

Keyboard and Pointing Device

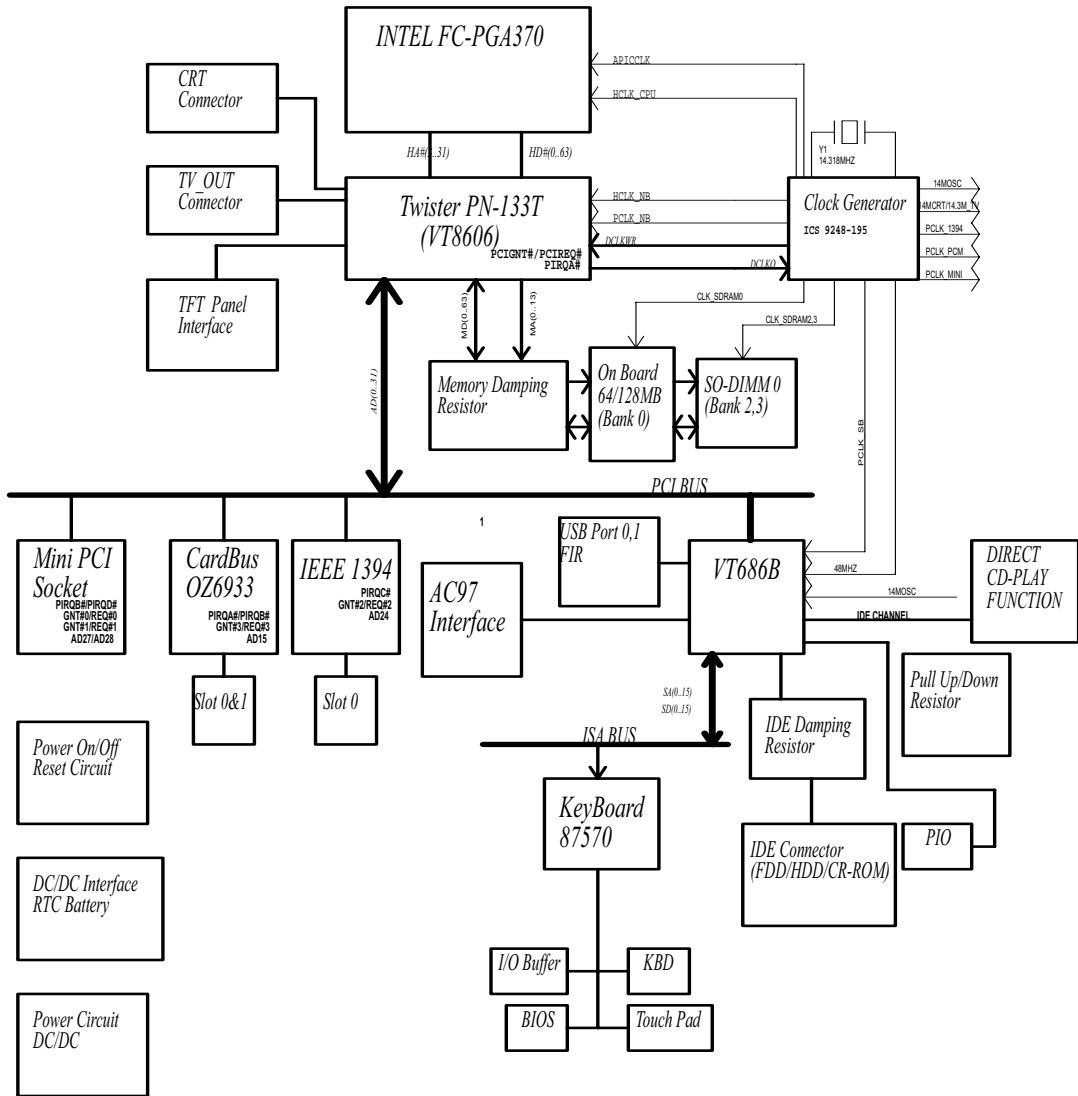

- 85-/86-key Windows keyboard
- Ergonomically-centered touchpad pointing device

I/O Ports

- One type III or two type I/II PC Card slots (PCMCIA, CardBus)
- One RJ-11 modem jack (V.90, 56K)
- One RJ-45 network jack (Ethernet 10/100)
- One DC-in jack
- One parallel port (ECP/EPP)
- One external monitor port
- One keyboard/mouse port (PS/2)
- One speaker/headphone-out jack (3.5mm minijack)
- One microphone-in jack (3.5mm minijack)
- One video-out jack (S-video)
- Two Universal Serial Bus (USB) ports
- One IEEE 1394 port

System Block Diagram

System Block Diagram

Board Layout

Top View

- | | | | |
|---|-------------------------|---|--|
| 1 | Power On/Off LID switch | 5 | Software debug only, normally shipping on this connector |
| 2 | LCD connector | 6 | FDD connector |
| 3 | LID switch | 7 | Internal keyboard connector |
| 4 | System board connector | 8 | Switch board connector |

Bottom View

| 1 | Mini PCI connector | 9 | So-DIMM connector for SDRAM only |
| 2 | 1394 Connector | 10 | CPU fan connector |
| 3 | CPU socket for FC-PGA370 | 11 | PCMCIA socket connector |
| 4 | CD-ROM connector | 12 | Battery connector |
| 5 | Print port connector | 13 | AC adapter input connector |
| 6 | CRT connector | 14 | PS/2 keyboard and PS/2 mouse connector |
| 7 | TV out connector for S-video only | 15 | USB connector |
| 8 | HDD connector | 16 | USB connector |

Outlook View

A general introduction of ports allow you to connect peripheral devices, as you would with a desktop PC.

Front View

#	Icon	Item	Description
1	1	Display screen	Also called LCD (liquid-crystal display), displays computer output.
2		Power button	Turns on the computer power.
3		Status LCD	LCD that display icons to show the status of the computer and its functions and components.
4		Keyboard	Inputs data into your computer.
5		Touchpad	Touch-sensitive pointing device which functions like a computer mouse.
6		Click buttons (left and right)	The left and right buttons function like the left and right mouse buttons.
7		Launch keys	Buttons for launching frequently-used programs. Please see User's Guide "Launch keys" on page 22 for more details.
8		Status indicators	Shows the power and email status.
9		Speaker	Outputs sound.
10		Palmrest	Comfortable support area for your hands when you use the computer.
11		Floppy drive	Accepts a 3.65-inch diskette.
12		Floppy drive eject button	Press to eject the diskette from the floppy drive.

Left Panel

#	Icon	Item	Description
1		Optical drive	Depending on your model: --CD-ROM drive reads CDs --DVD-ROM drive reads CDs and DVDs --DVD/CD-RW combo drive reads CDs and DVDs, and writes to CD-Rs and CD-RWs.
2		Optical drive eject button	Ejects the disc from the optical drive.
3		Optical drive emergency eject hole	Eject the disc from the optical drive when the computer is turned off. See User's Guide "How do I eject the optical drive tray with the computer turned off?" on page 78 for more details.

Right Panel

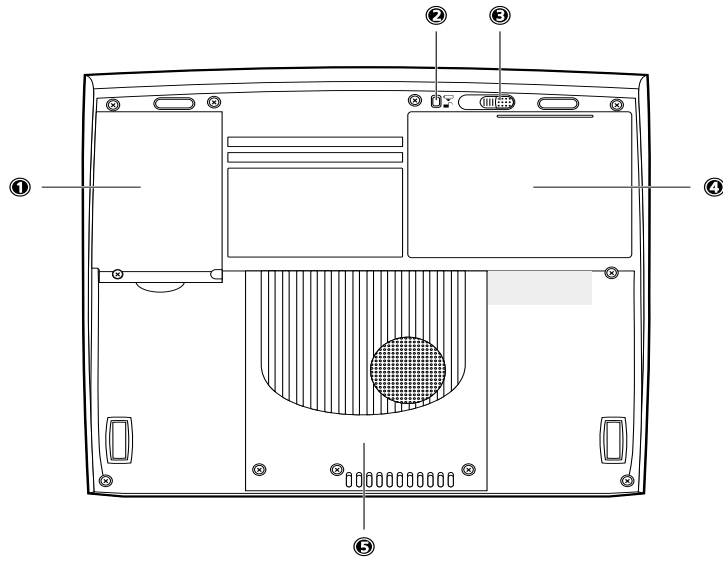

#	Icon	Item	Description
1		Speaker/headphone-out jack	Connects to audio line-out devices (e.g., speakers, headphones).
2		Microphone-in jack	Connects and external microphone.
3		PC Card eject buttons	Eject the selected PC Card from its slot.
4		PC Card slots	Accepts one Type III or two TypeII/ PC Card(s).
5		DC-in jack	Connects to the AC adapter.
6		PS/2 port	Connects to a PS/2-compatible device (e.g., PS/2 keyboard/mouse/keypad).
7		USB port (two)	Connects to the USB devices (e.g., USB mouse).

Rear Panel

#	Icon	Item	Description
1		Security keylock	Connects to a Kensington-compatible computer security lock.
2	IEEE 1394	IEEE 1394 port	Connects to a IEEE 1394 compatible device (e.g., digital camcorder).
3	{Ether}	Network jack	Connects to an Ethernet 10/100-based network.
4		Modem jack	Connects a phone line (only for models with an internal fax/data modem).
5		Parallel port	Connects to a parallel device (e.g., parallel printer).
6		External display port	Connects to a display monitor.
7		Video-out port	Connects to a display device with S-video input.

Bottom Panel

#	Icon	Item	Description
1		Hard disk bay	Houses the computer's hard disk.
2		Battery release button	Press and hold to release the battery latch.
3		Battery release latch	Unlatches the battery to remove the battery pack.
4		Battery bay	Houses the computer's battery pack.
5		Memory compartment	Houses the computer's main memory.

Indicators

The computer has an easy-to-read status LCD (1) located above the keyboard. Two status indicators, power (2), and email (3) are located near the front of the computer.

The status LCD displays icons that show the status of the ocmputer and its components..

Icon	Function	Description
	Caps lock	Caps Lock is activated.
	Num lock	Numeric Lock (for embedded keypad) is activated.
	Pad lock	Pad Lock (for embedded keypad) is activated.
	Scroll lock	Scroll Lock is activated.
	Optical drive/Hard disk activity	CD or DVD drive or hard disk is being accessed.
	Floppy drive activity	Floppy drive is being accessed.
	PC Card activity	PC Card is being accessed.

Icon	Function	Description
	AC power	Computer is running on AC power.
	Battery charge	Battery is being charged.
	Battery full	Battery is fully charge.
	Battery gauge	Batter is 75 to 100 percent full.
	Battery gauge	Batter is 31 to 75 percent full, and battery is running low.
	Battery gauge	Battery is 6 to 30 percent full, and battery is running low. Note: Charge the battery as soon as possible.
	Battery gauge	Battery is critically-low. Note: Battery gauge icon is blinking.
	Battery gauge	Battery temperature is too high. Note: Save your work and shut down your computer to let the battery cool down.
	Battery gauge	Battery is not installed.

In addition to the status LCD, the computer includes power and email status indicators.

Icon	Function	Description
	Power	Lights when the computer is on.
	Email	Lights when incoming email is received. To launch your email program and read the incoming email, press the email button beside this indicator.

Lock Keys

The keyboard has three lock keys which you can toggle on and off.

Lock Key	Description
Caps Lock	When Caps Lock is on, all alphabetic characters typed are in uppercase.
Pad Lock (Fn-F10)	When Pad Lock is on, the embedded keypad is in cursor mode. The keys function as a directional keypad including Insert and Delete keys.
Num lock (Fn-F11)	When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad. See User's Manual "External keyboard" on page 40.
Scroll lock (Fn-F12)	When Scroll Lock is on, the screen moves one line up or down when you press  and  respectively. Scroll Lock does not work with some applications.

Embedded Numeric Keypad

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. The embedded keypad can function in numeric mode or cursor-control mode.

Desired Access	Num Lock On	Pad Lock On
Number keys on embedded keypad	Type numbers in a normal manner.	Hold  while typing numbers.
Cursor-control keys on embedded keypad	Hold  while using cursor-control keys.	Use cursor-control keys in a normal manner.
Main keyboard keys	Hold Fn while typing letters on embedded keypad. Also hold down  for capital letters.	Hold Fn while typing letters on embedded keypad. Also hold down  for capital letters.

Windows Keys

The keyboard has two keys that perform Windows-specific functions.

Key	Icon	Description
Windows logo key		Start button. Combinations with this key perform special functions. Below are a few examples: <ul style="list-style-type: none">+ Tab (Activates next taskbar button)+ E (Explores My Computer)+ F (Finds Document)+ M (Minimizes All) + Windows logo key + M (Undoes Minimize All)+ R (Displays Run dialog box)
Application key		Opens a context menu (same as a right-click).

Hot Keys

The computer uses hotkey or key combinations to perform functions such as controlling the screen brightness and specifying where to display output.

Hot Key	Icon	Function	Description
Fn-F5		Display toggle	Switches display output between the display screen, external monitor (if connected) and both the display screen and external monitor.
Fn- 		Brightness Up	Increases the screen brightness.
Fn- 		Brightness Down	Decreases the screen brightness.

NOTE: When activating hotkeys, press and hold the **Fn** key before pressing the other key in the hotkey combination.

Keyboard Ergonomics

Located below the keyboard, the wide and curved palm rest is ergonomically designed to provide you with a very comfortable place to rest your hands while you type.

Touchpad

The built-in touchpad is a PS/2-compatible pointing device that senses movement on its surface. This means the cursor responds as you move your finger on the surface of the touchpad. The central location on the palm rest provides you optimum comfort and support.

NOTE: If you are using an external PS/2 mouse, the touchpad is automatically disabled. You can enable or disable this function in BIOS.

Touchpad Basics

The following teaches you how to use the touchpad:

- Move your finger across the touchpad to move the cursor.
- Press the left (1) and right (2) buttons located on the edge of the touchpad to do selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad produces similar results.

Function	Left Button	Righ Button	Tap
Execute	Click twice quickly		Tap twice (at the same speed as double-clicking the mouse button)
Select	Click once		Tap once
Drag	Click and hold, then use finger to drag the cursor on the touchpad		Tap twice (at the same speed as double-clicking a mouse button) then hold finger to the touchpad on the second tap to drag the cursor
Access context menu		Click once	
Scroll			

NOTE: Keep your fingers dry and clean when using the touchpad. Also keep the touchpad dry and clean. The touchpad is sensitive to finger movements. Hence, the lighter the touch, the better the response. Tapping too hard will not increase the touchpad's responsiveness.

Launch Keys

Located near the front end of the computer (between the speakers) are launch keys that perform various functions.

Depending on the set mode, these launch keys may be used to launch applications for play back music CDs.

NOTE: The Audio DJ feature is also available even when the computer is off.

#	Icon	Item	Description
1		Mode Switch	This sets the launch key mode. Slide the switch to the desired mode.
1			AP (Application) mode.
1			Lock mode
1			Audio DJ mode
2	1	1 (AP mode)	Launches a user-configurable application.
2		Stop/Eject (Audio DJ mode)	Stop playback of the music CD; when playback is stopped, ejects the drive tray.

#	Icon	Item	Description
3	2	2 (AP mode)	Launches a user-configurable application.
3	▶/	Play/Pause (Audio DJ mode)	Plays and pauses playback of the music CD.
4		Email (AP mode)	Launches your email program.
4	⏮	Previous Track (Audio DJ mode)	Jumps to the previous track on the music CD. (AP mode)
5		Internet Browser (AP mode)	Launches your internet browser.
5	⏭	Next Track (Audio DJ mode)	Jumps to the next track on the music CD.
6		Volume Buttons	Decreases (-) or increase (+) the volume.

Hardware Specifications and Configurations

Processor

Item	Specification
CPU type	Pentium III 1.0G/Pentium III 1.13G
CPU package	FC-PGA package/FC-PGA2 package
CPU core voltage	1.75V/1.475V
CPU I/O voltage	1.25V/1.25V

BIOS

Item	Specification
BIOS vendor	Phoenix
BIOS Version	1.0
BIOS ROM type	Flash ROM
BIOS ROM size	512KB
BIOS package	TSOP
Supported protocols	ACPI 1.0b, PC Card 95, SM BIOS 2.3, EPP/IEEE 1284, ECP/IEEE 1284 1.7 & 1.9, PCI 2.2, PnP 1.0a, DMI 2.0, PS/2 keyboard and mouse, USB, VESA VGA BIOS, CD-ROM bootable,
BIOS password control	Set by setup manual

Second Level Cache

Item	Specification
Cache controller	Built-in CPU
Cache size	128KB/512KB
1st level cache control	Always enabled
2st level cache control	Always enabled
Cache scheme control	Fixed in write-back

System Memory

Item	Specification
Memory controller	Via Twister-T
Onboard memory size	128MB
DIMM socket number	1 sockets (2 banks)
Supports memory size per socket	512MB
Supports maximum memory size	640MB
Supports DIMM type	Synchronous DRAM
Supports DIMM Speed	100MHz or 133 MHz
Supports DIMM voltage	3.3V
Supports DIMM package	144-pin soDIMM
Memory module combinations	You can install memory modules in any combinations as long as they match the above specifications.

Memory Combinations

On Board	Slot 1	Total Memory
128 MB	0 MB	128 MB
128 MB	64 MB	192 MB
128 MB	128 MB	256 MB
128 MB	256 MB	384 MB
128 MB	512 MB	640 MB

Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations.

NOTE: The shipping specification for DIMM combination is 128MB in slot 1..

LAN Interface

Item	Specification
Supports LAN protocol	10/100 Mbps
LAN connector type	RJ45
LAN connector location	Rear side

Modem Interface

Item	Specification
Data modem data baud rate (bps)	56K
Supports modem protocol	V.90 MDC
Modem connector type	RJ11
Modem connector location	Rear side

Floppy Disk Drive Interface

Item	Specification		
Vendor & model name	Mitsumi D353G		
Floppy Disk Specifications			
Media recognition	2DD (720KB)	2HD (1.2MB, 3-mode)	2HD (1.44MB)
Sectors/track	9	15	18
Tracks	80	80	80
Rotational speed (RPM)	300	360	300
Read/write heads	2		
Encoding method	MFM/FM		
Power Requirement			
Input Voltage (V)	+5V +/- 10%

Voltage tolerance	5V(DC) +/- 5%	5V(DC) +/- 5%	5V(DC) +/- 5%	5V(DC) +/- 5%	5V(DC) +/- 5%	5V(DC) +/- 5%

DVD-ROM Interface

Item	Specification	
Vendor & model name	Toshiba SD-C2502	
Performance Specification	With CD Diskette	With DVD Diskette
Transfer rate (KB/sec)	Sustained: Max 3.6Mbytes/sec	Sustained: Max 10.8Mbytes/sec
Data Buffer Capacity	128 KBytes	
Interface	IDE/ATAPI	
Applicable disc format	DVD: DVD-ROM (DVD-5, DVD-9, DVD-10, DVD-18), DVD-R (read, single border) CD: CD-DA, CD+(E)G, CD-MIDI, CD-TEXT, CD-ROM, CD-ROM XA, CD-I, CD-I Bridge (Photo-CD, Video-CD) Multisession CD (Photo-CD, CD-EXTRA, CD-R, CD-RW), CD-R (read), CD-RW (read)	
Loading mechanism	Load: Manual Release: (a) Electrical Release (Release Button) (b) Release by ATAPI command (c) Emergency Release	
Power Requirement		
Input Voltage	+5 V +/- 5 % (Operating) +/- 8 % (Start up)	

Audio Interface

Item	Specification
Audio Controller	CS 4299
Audio onboard or optional	Built-in
Mono or Stereo	Stereo
Resolution	20 bit stereo Digital to analog converter 18 bit stereo Analog to Digital converter
Compatibility	Microsoft PC98/PC99, AC97 2.1
Mixed sound source	Line-in, CD, Video, AUX
Voice channel	8/16-bit, mono/stereo
Sampling rate	44.1 KHz
Internal microphone	No
Internal speaker / Quantity	Yes
Supports PnP DMA channel	DMA channel 0 DMA channel 1
Supports PnP IRQ	IRQ3, IRQ5, IRQ7, IRQ9, IRQ10, IRQ11

Video Interface

Item	Specification
Chip vendor	VIA
Chip name	TWISTER-T
Chip voltage	Core/3.3V
Supports ZV (Zoomed Video) port	No

Video Resolutions Mode (for both LCD and CRT)

Resolution	8 bits (256 colors)	16 bits (High color)	24 bits (True color)	32 bits (True color)
640x480	Yes	Yes	Yes	Yes
720x480	Yes	Yes	Yes	Yes
800x600	Yes	Yes	Yes	Yes
848x480	Yes	Yes	Yes	Yes
1024x768	Yes	Yes	Yes	Yes
1152x864	Yes	Yes	Yes	Yes
1280x1024	Yes	Yes	Yes	Yes
1400x1050	Yes	Yes	Yes	Yes
1600x1200	Yes	Yes	Yes	Yes

Parallel Port

Item	Specification
Parallel port controller	VT686B
Number of parallel port	1
Location	Rear side
Connector type	25-pin D-type connector, in female type

Parallel Port

Item	Specification
Parallel port function control	Enable/Disable/Auto (BIOS or operating system chooses configuration) by BIOS Setup Note: Depending on your operating system, disabling an unused device may help free system resources for other devices.
Supports ECP/EPP/Bi-directional (PS/2 compatible)	Yes (set by BIOS setup) Note: When Mode is selected as EPP mode, "3BCh" will not be available.
Optional ECP DMA channel (in BIOS Setup)	DMA channel 1 and 3
Optional parallel port I/O address (in BIOS Setup)	3BCh, 278h, 378h
Optional parallel port IRQ (in BIOS Setup)	IRQ7, IRQ5

USB Port

Item	Specification
USB Compliancy Level	1.1
OHCI	USB 1.1
Number of USB port	2
Location	Right panel
Serial port function control	Enable/Disable by BIOS Setup

PCMCIA Port

Item	Specification
PCMCIA controller	OZ6933
Supports card type	Type-III/II
Number of slots	One type-III or Two type-II
Access location	Left side
Supports ZV (Zoomed Video) port	No ZV support
Supports 32 bit CardBus	Yes (IRQ11)

System Board Major Chips

Item	Controller
System core logic	VIA PN133/VT686B
Super I/O controller	Build in VT686B
Audio controller	Crystal 4299 AC 97 codes
Video controller	VIA Twister-T
Hard disk drive controller	VT686B
Keyboard controller	87570
RTC	VT686B

Keyboard

Item	Specification
Keyboard controller	NS 87570
Keyboard vendor & model name	Chicony MPO 130
Total number of keypads	87 keys with 101/102 key emulation

Keyboard

Item	Specification
Windows 95 keys	Yes
Internal & external keyboard work simultaneously	Yes

Battery

Item	Specification
Vendor & model name	Panasonic/SUMSUNG
Battery Type	Li-ion
Pack capacity	57Wh
Cell voltage	V/cell
Number of battery cell	8
Package configuration	4 cells in series, 2 series in parallel
Package voltage	14.8V

LCD Inverter Specification FOR 14.1"

Panel List

No.	LCD Type	Vendor	Model No.	Frequency range (Min./Typ./Max)	Lamp current (mArms) Min/Typ/Max
1	14.1" SVGA TFT	HANSTAR	HSD141PX11-A REV1	40/50/60KHz	20-6.5mA
2	14.1" SVGA TFT	IBM	ITXG77X	40/60/65HKz	2.5-6.4mA

General Description

This inverter is designed for the CCFL of α 550 14.1" LCD which are using on the α 550 notebook. We use two signals to control the LCD brightness. One is the **Enable**, which turn on and turn off the birightness of LCD. The other is the **PWM**, which tune the brightness by modulating the duty cycle. This inverter uses open loop control circuit and meets with safety requirements.

Features

1. +5V Fixed input voltage
2. Birghtness adjustment by PWM duty cycle
3. Current Limited function, meet with safety requirement

Inverter Characteristics

No.	Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
1	Input voltage	+5V	4.75	4.85	4.95	V	
2	Input current	Iin	--	---	1A	A	
3	Lamp Current	IL	5.50	5.75	6.00	mArms	Enable= H, PWM Duty = 100%
				3.0		mArms	Enable = H, PWM Duty = 30%
4	Lamp voltage			625		Vrms	At IL = 6.0 mArms

Inverter Characteristics

No	Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
5	Frequency	F	45	55	65	kHz	*2
6	Output power	Pout	--	--	4.5	W	
7	Efficiency	η	80	85	--	%	
8	Starting voltage	Vs	1500	---	---	Vrms	At 0 degree C
9	Enable	VIH	2.4			V	Compal Output H: 3.3V Compal Output L: 0V
		VIL	--	--	0.8	V	
10	PWM signals *3		--	150	--	Hz	PWM signal frequency
		VIH	2.4			V	Compal OUtput H: 5.0V
		VIL			0.8	V	Compal Output L: 0V
			30	--	100	%	
11	Current Waveform factor	$\frac{I_p}{I_{rms}}$	1.27	$\sqrt{2}$	1.56	Multiple	OR $\frac{I_{-p}}{I_{rms}}$ *8
12	Unbalance Rate	$\frac{I_p - I_{-p} }{I_{rms}}$	-10%	0	+10%	Multiple	

Environment: Temperature: Operating temperature: 0°C~55°C

Storage temperature: -20°C~80°C

Humidity: 0~90% without condensation

MTBF: 5000 hours

NO.1: 14.1" XGA TFT, HANSTAR, HSD141PX11-A

NOTE: Please pay attention to the following:

- *1. Make sure open lamp output voltage should be within starting voltage specification.
- *2. Inverter should pass human body safety test.
- *3. PWM signal is a 150HZ square wave. The backlight brightness is maximum when PWM at 100% duty cycle and backlight brightness is minimum when PWM at 30% duty cycle. Ps1. Duty cycle=T(on)/T(period)
- *4. The Inverter output should be 100% duty cycle when lamp current is less than 70% lamp current setting. (No matter of PWM signal)
- *5. Transformer voltage stress should not be over 85%.
- *6. Transformer temperature rising should be less than 30 degree C.

*7. Audio noise: less than 36db@10cm distance

NOTE: *8. Wave form requirement: $1.27 \leq I_p/I_{rms} \leq 1.8$

LCD Inverter Specification FOR 15.0"

Panel Lis

No.	LCD Type	Vendor	Model No.	Frequency range Min./Typ./Max	Lamp current (mArms) Min/Typ/Max
	15.0" XGA TFT	LG	LP150X1-G2CP (XGA TFT)	40/60/80KHz	3.0/6.0/8.0mA
	15.0" SXGA TFT	IBM	ITSX95C	40/.../60KHz	3.0/6.5/7.0mA

This Inverter is designed for the CCFL of α 550 15.1" LCD which are using on the α 550 notebook. We use PWM duty to control the LCD brightness.

Features

1. +5V fixed input voltage
2. Brightness adjustment by PWM duty cycle.
3. Build with Current limited function and open lamp protection function, meet with safety requirement.

Inverter Characteristics

No.	Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
1	Input voltage	Vin	4.7	4.8	4.9	V

			30	--	100	%	

Inverter Characteristics

No	Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
11	Current Waveform factor	$\frac{I_p}{I_{rms}}$	1.27	$\sqrt{2}$	1.56	Multiple	OR *10 $\frac{I_{-p}}{I_{rms}}$
12	Unbalance Rate	$\frac{I_p - I_{-p} }{I_{rms}}$	-10%	0	+10%	Multiple	

Environment: Temperature: Operating temperature: 0°C~55°C

Storage temperature: -20°C~80°C

Humidity: 0~90% without condensation

MTBF: 5000 hours

NO.1: 14.1" XGA TFT, HANSTAR, HSD141PX11-A

NOTE: Please pay attention to the following:

- *1. Make sure open lamp output voltage should be within starting voltage specification.
- *2. Inverter should pass human body safety test.
- *3. Inverter should no smoking by any component open/short test.
- *5. Transformer temperature rising should be less than 30 degree C.
- *6. Transformer voltage stress should not be over 85% under any condition (turn on overshoot transient and line transient).
- *7. Wave from requirement: $1.27 \leq I_p/I_{rms} \leq 1.56$
- *8 Audio noise should be less than 36dB at 10cm distance.
- *9 I_p implies zero to positive peak value of lamp current.
- *10 I_{-p} implies zero to negative peak value of lamp current

LCD

LCD

Item	Specification			
Supply voltage for LCD display (V)	3.3	3.3	3.3	3.3
Supply voltage for LCD backlight (Vrms)	690	690	690	690

AC Adapter

Item	Specification
Vendor & model name	ADAPTER PA-1600-02 CA 60W 3 PINS
Input Requirements	
Maximum input current (A, @90Vac, full load)	1.8 A @ 90Vac 0.9 A @ 180Vac
Nominal frequency (Hz)	47 - 63
Frequency variation range (Hz)	47 - 63
Nominal voltages (Vrms)	90 - 264
Inrush current	The maximum inrush current will be less than 50A and 100A when the adapter is connected to 115Vac(60Hz) and 230Vac(50Hz) respectively.
Efficiency	It should provide an efficiency of 83% minimum, when measured at maximum load under 115V(60Hz).
Output Ratings (CV mode)	
DC output voltage	+18.8V~20.0V including the effects of line voltage variation, load current, ripple and noise
Noise + Ripple	300mvp-pmax (20MHz bandwidth) for resistor load
Output current	0 A (min.) 3.16 A (max.)
Output Ratings (CC mode)	
DC output voltage	+12V ~ +19V
Constant output	3.16A
Dynamic Output Characteristics	
Start-up time	2 sec. (@115Vac)
Hold up time	5 ms min. (@115 Vac input, full load)
Over Voltage Protection (OVP)	27 V
Short circuit protection	Output can be shorted without damage, and auto recovery
Electrostatic discharge (ESD)	15kV (at air discharge) 8kV (at contact discharge)
Dielectric Withstand Voltage	
Primary to secondary	2150 Vdc for 1 second
Leakage current	100uA at 254Vac
Regulatory Requirements	1. FCC class B requirements(USA) 2. VDE class B requirements(German) 3. VCCI classII requirements(Japan)

ACPI mode	Power Management
Mech. Off (G3)	<input type="checkbox"/> All devices in the system are turned off completely.
Soft Off (G2/S5)	<input type="checkbox"/> OS initiated shutdown. All devices in the system are turned off completely.

ACPI mode	Power Management
Working (G0/S0)	<input type="checkbox"/> Individual devices such as the CPU and hard disk may be power managed in this state.
S1 Sleeping State	<input type="checkbox"/> CPU Stop Clock <input type="checkbox"/> VGA Standby, turn off back-light <input type="checkbox"/> PCMCIA Standby <input type="checkbox"/> Hard Disk Spin Down motor <input type="checkbox"/> CD-ROM Spin Down <input type="checkbox"/> Super I/O Power down

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press **F2** during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Main	System Devices	Security	Others	Boot	Exit
					Item Specific Help

Esc Exit	←→ Select Menu	Enter Select > Sub-Menu	F10 Save and Exit		

Navigating the BIOS Utility

There are six menu options: Main, System Device, Security, Others, Boot, and Exit.

Follow these instructions:

- To choose a menu, use the cursor left/right keys (**←** **→**).
- To choose a parameter, use the cursor up/down keys (**↑** **↓**).
- To change the value of a parameter, press **F5** or **F6**.
- A plus sign (+) indicates the item has sub-items. Press **ENTER** to expand this item.
- Press **ESC** while you are in any of the menu options to go to the Exit menu.
- In any menu, you can load default settings by pressing **F9**. You can also press **F10** to save any changes made and exit the BIOS Setup Utility.

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values.

Main

The Main screen displays a summary of your computer hardware information, and also includes basic setup parameters.

Main	System Devices	Security	Others	Boot	Exit
					Item Specific Help
System Time:	[11:21:00]				
System Date:	[09/11/2001]				
Floppy Drive:	1.44MB, 3½"				
Hard Disk:	IBM-DJSA-220-(PM)				
Quiet Boot:	[Enabled]				
Power on display:	[Auto-Selected]				
LCD Display stretch:	[Enabled]				
System Memory:	640 KB				
Extended Memory:	113664 KB				
BIOS Ver.:	V1.00				
F1 Help	↑↓ Select Item	F5/F6 Change Values	F9 Setup Defaults		
Esc Exit	←→ Select Menu	Enter Select > Sub-Menu	F10 Save and Exit		

NOTE: The screen above is for reference only. Actual values may differ.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings..

Parameter	Description	Format/Option
System Time	Sets the system time.	Format: HH:MM:SS (hour:minute:second)System Time
System Date	Sets the system date.	Format MM/DD/YYYY (month/day/year) System Date
Floppy Drive	Shows floppy drive type information.	
Hard Disk	Shows the hard disk model.	
Quiet Boot	Determines the way the system boots up. Shows the high-capacity disc drive installed.	Options: Enabled or Disabled
Power on display	Determines the display device on startup.	Option: Auto-Selected or Simultaneous
LCD Display stretch	Specifies whether or not to expand the image to fill the screen	Option: Enabled or Disabled
System Memory	Shows the amount of system memory.	
Extended Memory	Shows the amount of extended memory	
BIOS Ver.Product Name	Shows the system BIOS version.	

The items in this screen are important and vital information about your computer. If you experience computer problems and need to contact technical support, this data helps our service personnel know more about your computer.

NOTE: Main memory = system memory + extended memory

System Devices

The System Devices screen contains parameters involving your hardware devices.

Main	System Devices	Security	Others	Boot	Exit
					Item Specific Help
Pointing Device:		[Simultaneous]			
Ext. Keyboard "Fn":		[Enabled]			
IDE Controller:		[Both]			
FDD Controller:		[Enabled]			
Parallel Port:		[Enabled]			
Interrupt:		[IRQ 7]			
Mode:		[ECP]			
Base I/O address:		[378]			
DMA channel:		[DMA 3]			
VGA Frame Buffer Size:		[16 Mb]			
F1 Help Esc Exit	↑↓ Select Item ←→ Select Menu	F5/F6 Change Values Enter Select > Sub-Menu	F9 Setup Defaults F10 Save and Exit		

The table below describes the parameters in the screen Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Options
Pointing Device	Determines whether or not to disable the internal touchpad of a PS/2 pointing device is connected.	Simultaneous or Auto-Selected
Ext.Keyboard "Fn"	Allows you to simulate an Fn key on an external keyboard by pressing the left b + left a keys	Enabled or Disabled
IDE Controller	Enables or disables the primary or secondary IDE controller or both.	Both , Primary or Disabled
FDD Controller	Enables or disables the floppy drive controller.	Enabled or Disabled
Parallel Port	Enables or disables the parallel port.	Enabled or Disabled
IRQ	Sets the interrupt request of the parallel port.	IRQ 7 or IRQ5
Mode	Sets the operation mode of the parallel port.	ECP , EPP or Bi-directional
Base I/O address	Sets the I/O address of the parallel port. This parameter is enabled only if Mode is set to ECP or Bi-directional.	378 , 278 or 38C
DMA Channel	Sets a DMA channel for the printer to operate in ECP mode. This parameter is enabled only if Mode is set to ECP.	3 or 1
VGA Frame Buffer Size	Specifies the amount of main memory to allocate for VGA.	16Mb , 32Mb or 8Mb

NOTE: VGA takes up a portion of system memory, configurable via the VGA Frame Buffer parameter. For example, if you have 128 MB SDRAM, and you set a VGA Frame Buffer of 16MB, main memory is 112MB.

Security

The Security screen contains parameters that help safeguard and protect your computer from unauthorized use.

Main	System Devices	Security	Others	Boot	Exit
User Password: Clear Set User Password: [Enter] Password on boot: [Disabled]					Item Specific Help
F1 Help Esc Exit	↑↓ Select Item ←→ Select Menu	F5/F6 Change Values Enter Select > Sub-Menu	F9 Setup Defaults F10 Save and Exit		

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Option
User Password	Shows the setting of the user password.	Clear or Set
Set User Password	Press Enter to set the user password. When set, this password protects the BIOS Setup Utility from unauthorized access.	
Password on boot	When enabled, the user password protects the computer from unauthorized access during boot up.	Disabled or Enabled

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

Setting a Password

Follow these steps:

1. Use the **↑** and **↓** keys to highlight the Set User Password parameter and press the **ENTER** key. The Set User Password box appears:

Set Password	
Enter new password:	[]
Confirm new password:	[]

-
2. Type a password in the Enter new password field. The password may consist of up to eight alphanumeric characters (A-Z, a-z, 0-9). Retype the password in the Confirm new password field.

IMPORTANT: Be very careful when typing your password because the characters do not appear on the screen.

3. Press **ENTER**.
After setting the password, the computer sets the User Password parameter to “Set”.
4. If desired, you can opt to enable the Password on boot parameter.
5. When you are done, press **F10** to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

1. Use the **↑** and **↓** keys to highlight the Set User Password parameter and press the **ENTER** key. The Set Password box appears:

Set Password		
Enter Current Password	[]
Enter New Password	[]
Confirm New Password	[]

2. Type the current password in the Enter Current Password field and press **ENTER**.
3. Press **ENTER** twice **without** typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the User Password parameter to “Clear”.
4. When you have changed the settings, press **F10** to save the changes and exit the BIOS Setup Utility.

Changing a Password

1. Use the **↑** and **↓** keys to highlight the Set User Password parameter and press the **ENTER** key. The Set Password box appears:

Set Password		
Enter Current Password	[]
Enter New Password	[]
Confirm New Password	[]

2. Type the current password in the Enter Current Password field and press **ENTER**.
3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
4. Press **ENTER**. After setting the password, the computer sets the User Password parameter to “Set”.
5. If desired, you can enable the Password on boot parameter.
6. When you are done, press **F10** to save the changes and exit the BIOS Setup Utility.

Others

The Others screen contains various parameter settings.

Main	System Devices	Security	Others	Boot	Exit
Low Battery Alarm: [Enabled] Panel Close Alarm: [Disabled] System Beep: [Enabled] Sticky Key: [Enabled] Installed O/S: [Win98/Me/2K/XP]					Item Specific Help
F1 Help Esc Exit	↑↓ Select Item ←→ Select Menu	F5/F6 Change Values Enter Select > Sub-Menu	F9 Setup Defaults F10 Save and Exit		

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Options
Low Battery Alarm	Determines whether or not the system will alarm when the battery power is low.	Enabled or Disabled
Panel Close Alarm	Determines whether or not the system will alarm when the display cover is closed.	Disabled or Enabled
System Beep	Determines whether or not the system will emit a beep on boot up.	Enabled or Disabled
Sticky Key	Determines whether or not to press Fn together with function keys (F1, F2...etc.) when you need to adjust the system functions, such as brightness. If you set it as enabled, then you do not have to press the function keys with the Fn key. You can press the Fn key once then adjust the function. If you select disabled, you have to press the Fn key with the function keys together	Enabled or Disabled
Installed O/S	Sets the operating system in use. Note: If your O/S is Win NT 4.0, please select the installed O/S as Win NT 4.0. Otherwise, there may be some power management problems occur, because Win NT 4.0 employs APC mode.	Win98/Me/2K/XP or only Win NT4.0

Boot

The Boot screen allows you to set the order in which the system looks for bootable devices on startup.

Main	System Devices	Security	Others	Boot	Exit
+Removable Devices +Hard Drive CD-ROM/DVD Drive Accton Network Boot					Item Specific Help
F1 Help Esc Exit	↑↓ Select Item ←→ Select Menu	F5/F6 Change Values Enter Select > Sub-Menu	F9 Setup Defaults F10 Save and Exit		

The table below describes these devices.

Parameter	Description
Removable Devices	The computer attempts to boot from the removable device (e.g., floppy drive). If unsuccessful, the system goes to the next device in the list.
Hard Drive	The computer attempts to boot from the hard disk. If unsuccessful, the system goes to the next device in the list.
CD-ROM/DVD Drive	The computer attempts to boot from the CD or DVD drive (looks for a bootable CD or DVD.)
Accton Network Boot	The computer attempts to boot from LAN.

NOTE: A plus (+) sign may be shown in front of a device. You can press **ENTER** to “expand” the device and see sub-items in this category.

Exit

The Exit screen contains parameters that help safeguard and protect your computer from unauthorized use.

Main	System Devices	Security	Others	Boot	Exit
Exit Saving Changes Exit Discarding Changes Load Setup Defaults Discard Changes Save Changes					Item Specific Help
F1 Help Esc Exit	↑↓ Select Item ←→ Select Menu	F5/F6 Change Values Enter Execute Command	F9 Setup Defaults F10 Save and Exit		

The table below describes the parameters in this screen.

Parameter	Description
Exit Saving Changes	Saves changes made and exits the BIOS Setup Utility (same as ).
Exit Discarding Changes	Discards changes made and exits the BIOS Setup Utility.
Load Setup Defaults	Loads default settings for all parameters (same as ).
Discard Changes	Discards changes made.
Save Changes	Save changes made.

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a **Crisis Recovery Diskette** before you use the Phlash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMS) when you use the Phlash.

NOTE: Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Follow the steps below to run the Phlash.

1. Prepare a bootable diskette.
2. Copy the Phlash utilities to the bootable diskette.
3. Then boot the system from the bootable diskette. The Phlash utility has auto-execution function.

System Utility Diskette

This utility diskette is for the Acer TravelMate α 550 notebook machine. You can find the utility in Service CD kit. It provides the following functions:

1. Panel ID Utility
2. Thermal & Fan Utility
3. Mother Board Data Utility

To use this diskette, first boot from this diskette, then a "Microsoft Windows ME Startup Menu" prompt you to choose the testing item. Follow the instructions on screen to proceed.

NOTE: This program contains a readme.txt file. This readme.txt file will introduce each test utility and its functions.

System Diagnostic Diskette

IMPORTANT: ¹The diagnostics program we use for TravelMate α 550 is not exactly the same as PQA (Product Quality Assurance), the diagnostic program we used to employ in other model. The system diagnostic utilities is provided by Acer Headquarters. You can utilize it as a basic diagnostic tool. To get this program, find it in the TravelMate α 550 service CD kit. To better fit local service requirements, your regional office MAY have other diagnostic program. Please contact your regional offices or the responsible personnel/channel to provide you with further technical details.

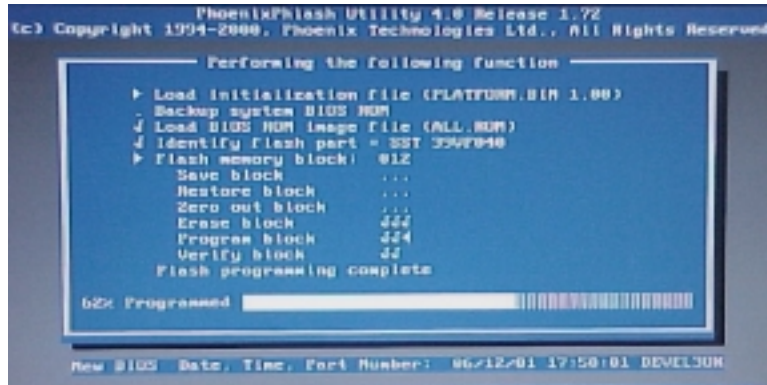

NOTE: For ASSY Function Test Procedure, please prepare the following items for system components test: PIO loopback, diskette, mouse (PS/2), CD-Disk (Test Program), battery pack, SYS_card (Card Bus)X2, AC-adaptor, keyboard, speaker and feather.

¹ New added description. Please pay attention to it.

Running Diagnostics Program

1. BIOS Re-flash

Insert CD-Disk and floppy disk then boot from floppy disk drive to BIOS re-flash.

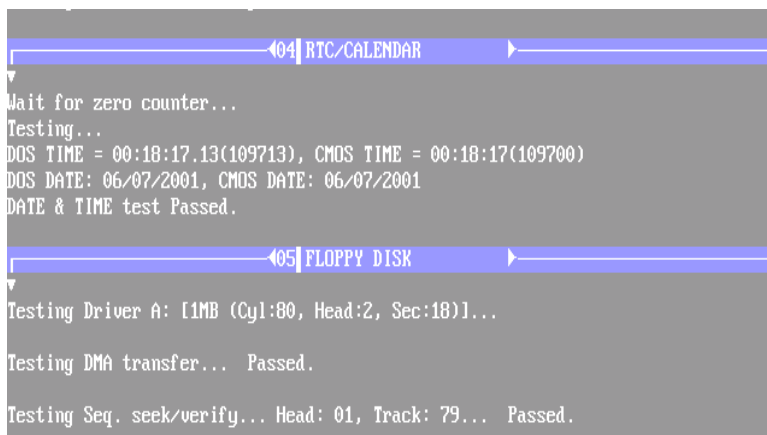

2. Parallel Port Test

Insert PIO loopback of parallel port for test.

3. RTC, FDD Test

Insert diskette to floppy disk drive for test.

4. Thermal Test

```

Begin Time(mm/dd hh:mm:ss) 6/11 16:58:39
Remote_Temp.=60 Local_Temp.=53 Fan_Voltage.= ff HCT.=0 6/11 16:58:39
Remote_Temp.=60 Local_Temp.=53 Fan_Voltage.= ff HCT.=0 6/11 16:58:40
Remote_Temp.=59 Local_Temp.=53 Fan_Voltage.= ff HCT.=0 6/11 16:58:41
PASS ! PASS !

```

5. CD-ROM Test

First test left channel, if you hear sounds then press **[ENTER]** key to test right channel.

```

LAP:00000(0000:01)06-07-101 COMPAL TSEL/F:CDROM.SCY IN:2 Version: PCBT
<01 COMPACT DISC ROM >
CD ROM Drive D:, MSCDEX ver.: 2.25, Driver name: CDROM1 , Vol.: COMPAL_TEST
Total 264496 sectors(2352 bytes/sector) = 622094592 bytes

Testing for DATA CD:
Testing CD ROM reset function...Passed.
Testing seq. read... sector: 243297( 24)
Testing fun. read... sector: 116361( 23) Passed.

Testing AUDIO CD first track...
Playing track 2, starting at 60:255:21

>> RIGHT CHANNEL <-> >>>>>>

```

If you hear sounds then press “P” key to pass this item.

```

LAP:00000(0000:01)06-07-101 COMPAL TSEL/F:CDROM.SCY IN:2 Version: PCBT
<01 COMPACT DISC ROM >
CD ROM Drive D:, MSCDEX ver.: 2.25, Driver name: CDROM1 , Vol.: COMPAL_TEST

Testing for DATA CD:
Testing CD ROM reset function...Passed.
Testing seq. read... sector: 243297( 24)
Testing fun. read... sector: 116361( 23) Passed.

Testing AUDIO CD first track...
Playing track 2, starting at 60:255:21

After listen -- [Passed] [Failed]: P

```

6. Batter Charge Test

Plug the AC adapter to the system for test.

```
ONLY FOR 30M3 SERIES BATTERY TEST. V1.0 2001/04/10
```

```
ManufactureDate: 1980/00/18                      Serial Number : 18
Design Capacity Value = 3900mAH
Battery fullcharge Capacity = 3911 mA
Design Voltage Value = 14800mv [Li_Ion]
Remaincharge capacity testing
Available Percentage Value = 3907mAH [99.9%]
Battery Supplier = Panas
Charge ->
Remaincharge capacity testing > 95.0% ... charge abort
```

7. Video mode Test

Check the RGB video mode display quality.

8. T/P Mouse Test

```
** FATMOUSE test version 1.08 **
Please check for mouse action & status
Test end coordinate X=0 Y=0 and push left and right buttons
```

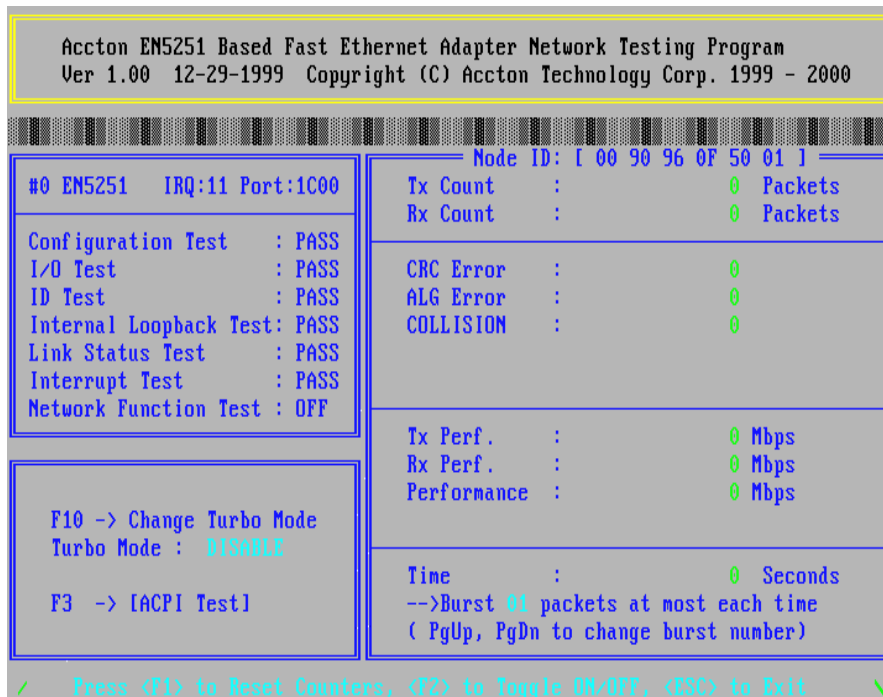

Coordinate		Button	
X	Y	Left	Right
280	152	0	0

9. FAN Test

Check if the fan has turned on with feathers.

```
FAN-ON
Press any key to continue . . .
```

10. LAN Test

11. Keyboard Test

Press all keys according to this order--from left to right and from up to down to test each key's function. If pass then press **CTRL** + Break to continue the next test.

12. 32bit Syscard Test

Insert two pieces of Syscard (Card bus) into PCMCIA slots for test. Check travel card if found error code on the card then record to SFIS and travel card else affix QC seal on the travel card.

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

To disassemble the computer, you need the following tools:

- Wrist grounding strap and conductive mat for preventing electrostatic discharge
- plastic screw driver
- FPC fixture
- Tweezers
- Flat-bladed screw driver or plastic stick
- hex screw driver
- plastic tool that can prize stripe cover

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components. When you remove the stripe cover, please be careful not to scrape the cover.

General Information

Before You Begin

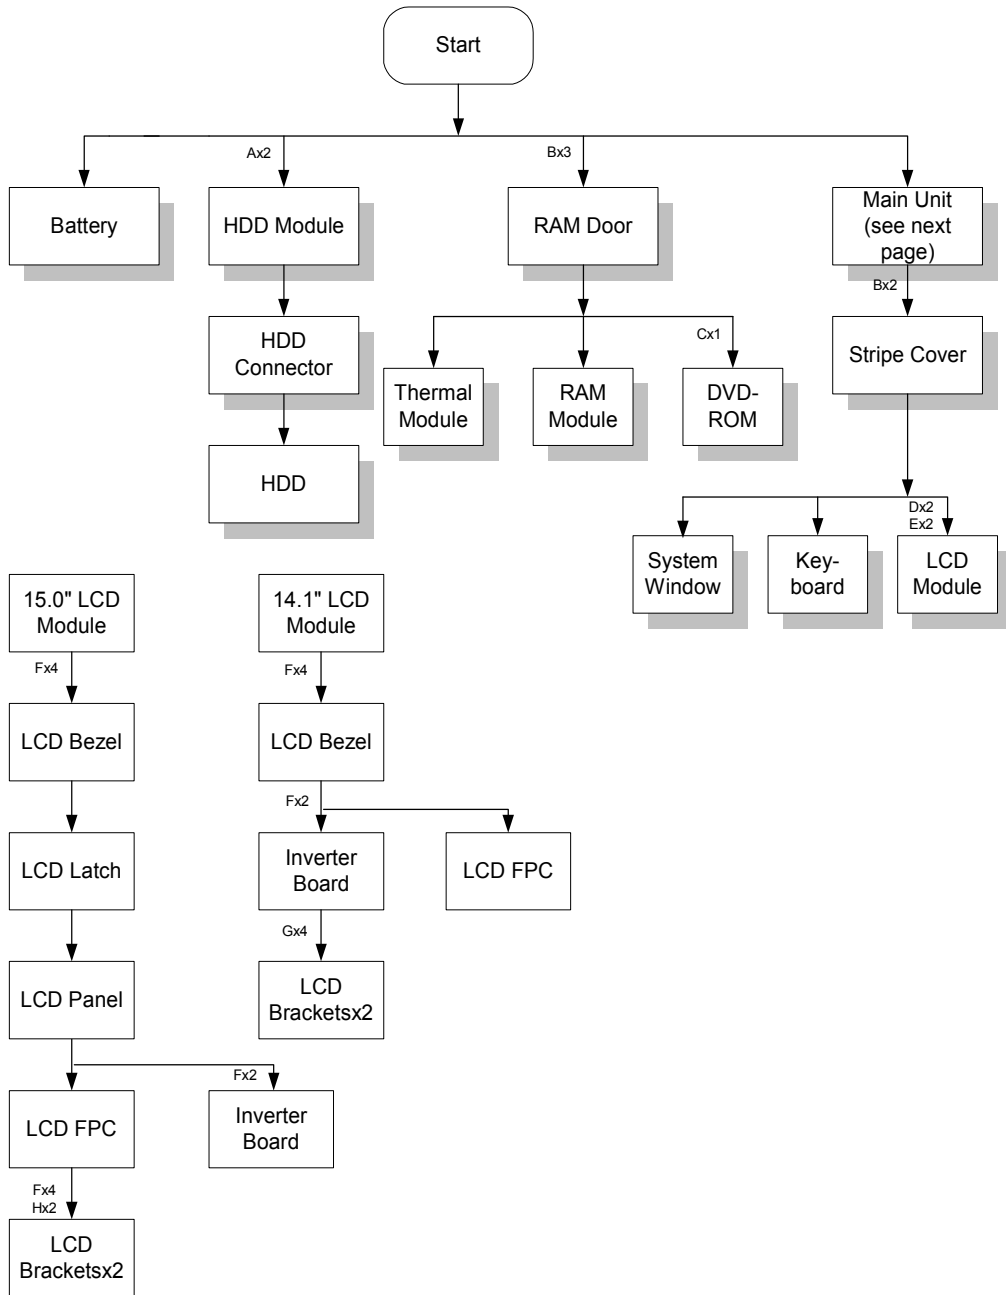

Before proceeding with the disassembly procedure, make sure that you do the following:

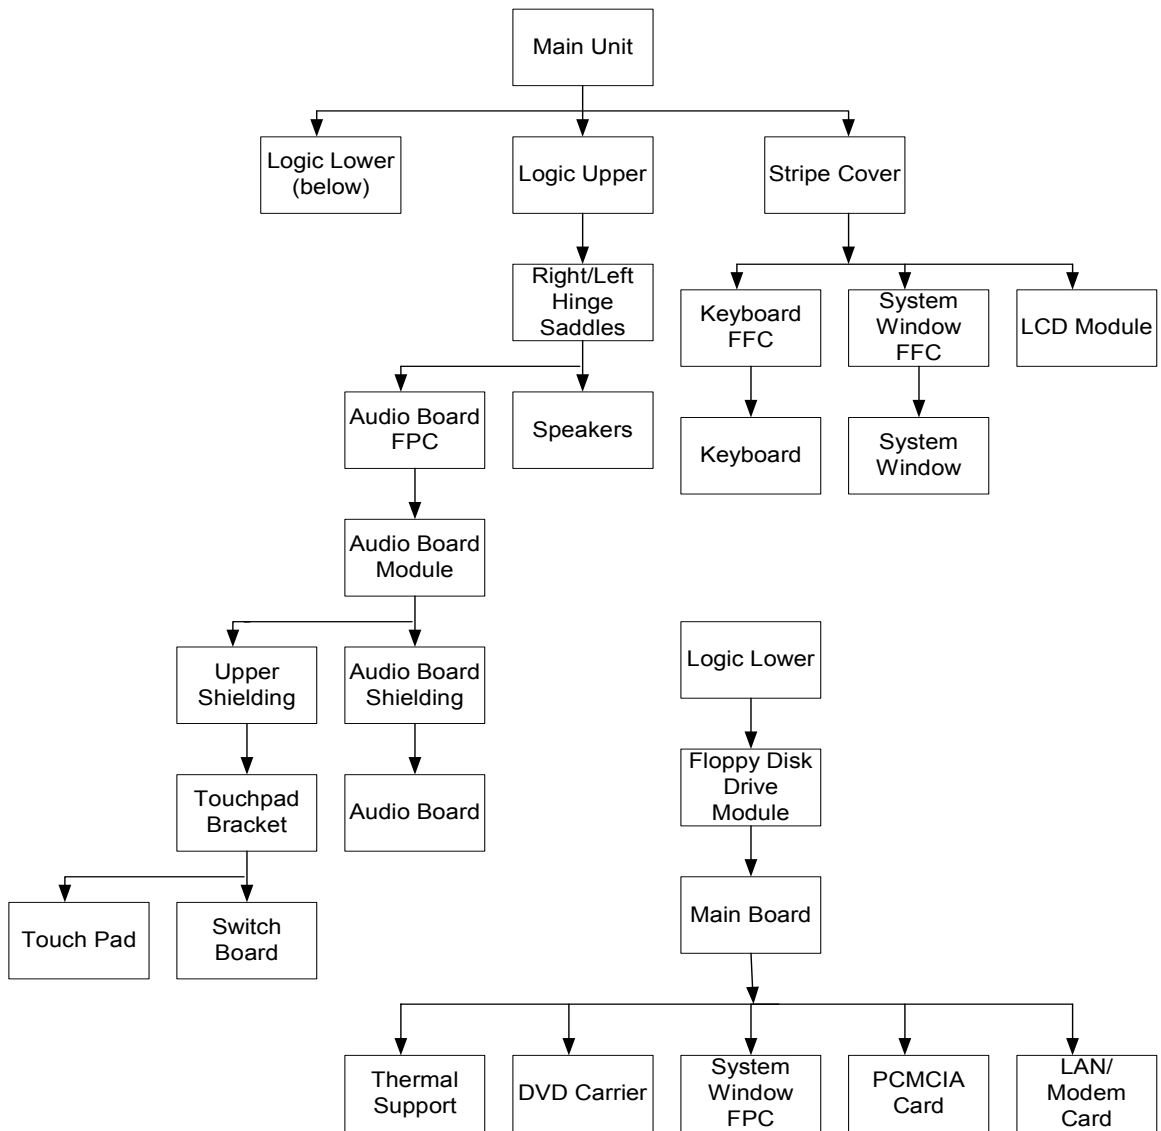

1. Turn off the power to the system and all peripherals.
2. Unplug the AC adapter and all power and signal cables from the system.
3. Remove the battery pack.

NOTE: TravelMate α 550 uses mylar or tape to fasten the FFC/FPC/connectors, you may need to tear the tape or mylar before you disconnect different FFC/FPC/connectors.

Disassembly Procedure Flowchart

The flowchart on the succeeding page gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the system board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Screw List

Item	Description
A	Screw M2.5 X 0.45+8FD-ZK
B	Screw M2.5 X 4.5P+3FP-ZK
C	Screw M2.5 X 0.45P+4FP-NI(NL)
D	Screw M2.5 X 0.45+8FP-NI(NL)
E	Screw M2.5 X 0.45+18FP-ZK(NL)
F	Screw M2.5 X 0.45P+5K-2K(NL)
G	Screw M2.0 X 0.4P+2.3(NL)
H	Screw M2.0 X 0.4P+3FP-ZK(NL)

Removing the Battery Pack

1. Press the battery lock.
2. Push the release button forward then remove the battery pack.

Removing the HDD Module/Thermal Module/CPU and DVD-ROM

1. Remove the two screws of the HDD module, then remove the HDD module from the logic lower.

2. Unscrew the three screws on the ram door. Then remove the ram door. Next, disconnect the thermal connector. Then, remove the four screws on the thermal module and remove the thermal module.

3. Use the CPU fixture and the flat-bladed screw driver to remove the CPU.

4. Remove the screw on the DVD-ROM bracket and push the DVD-ROM bracket. Then remove this module.

Removing the LCD Module/the Keyboard and the System Window

Removing the LCD Module

1. Remove the two (one on each side) screws holding the LCD stripe cover. Then prize the stripe cover with the plastic flat-bladed tool.
2. Unscrew the four screws (two on each side) holding the LCD module to the main unit. Then, Disconnect LCD FPC and remove the LCD module.

Removing the keyboard

1. Remove the four (two on each side) screws holding the keyboard.
2. Disconnect the keyboard connector. After disconnect the keyboard connector then remove the keyboard.

Removing the system window

1. Disconnect system window FPC.
2. Unscrew the two screws holding the system window. Then remove the system window.

Disassembling the Main Unit

Separate the main unit into the logic upper and the logic lower assembly

1. Remove the four screw locks from I/O port.
2. Then remove the two screws as the picture shows.

3. Remove the eight screws on the logic lower.
4. Disconnect switch board FPC.
5. Remove the logic upper from the main unit.

Disassembling the logic upper

1. Unscrew the five screws holding the right and the left hinge saddles.
2. Remove the right and the left hinge saddles.

3. Tear the mylar from logic upper assembly.
4. Remove the two screws holding the audio board.
5. Remove the audio board shielding.
6. Disconnect audio board FPC

7. Remove the four screws holding the upper shielding.
8. Release the two locks.
9. Then remove the upper shielding from the logic upper assembly.

10. Disconnect the two speakers wires (one on each side).
11. Remove the two screws holding the speakers on each side. Then remove the speakers.

12. Disconnect touchpad FFC from the touch pad.
13. Remove the touchpad bracket as the pictures show. Please see the yellow arrows.

14. Remove the touchpad.
15. Disconnect the touchpad FFC and then remove it.

16. Remove the two screws that hold switchboard on the logic upper. One is on the right; the other is on the left.
17. Disconnect the audio board FPC from the switchboard.
18. Disconnect the switchboard FPC.
19. These are complete steps for logic upper disassembly.

Disassembling the logic lower

1. Remove the two screws holding the floppy disk drive bracket.
2. Disconnect the floppy disk drive FFC.
3. Disconnect the system window FPC.

4. Remove the two screws holding the mainboard.
5. Then remove the mainboard carefully.

-
6. Unscrew the three screws that holds the DVD-ROM bracket.
 7. Remove the DVD-ROM bracket.

8. Remove the four screws holding the thermal support.
9. Remove the thermal support.

10. Tear the tape on LAN/Modem card.
11. Disconnect the LAN/Modem card from mini PCD.
12. Disconnect LAN/Modem wires from the LAN/Modem card.
13. These are complete steps for logic lower disassembly.

Disassembling the LCD Module-15 Inch

1. First remove the two screw pads then remove the two screws.
2. Disattach the LCD bezel carefully. Please note that you have to push forward at the two indentations.
3. Unscrew the two screws then remove the latch.

4. Unscrew the two screws on the inverter board.
5. Remove the four screws holding the right and left hinges. There are two screws on each side.
6. Remove the right and the left hinge.

7. Detach the EMI tape and then remove LCD from the cover carefully.
8. Disconnect the inverter board from LCD FPC.
9. Disconnect the LCD power connector.

10. Disconnect the LCD FPC.
11. Unscrew the eight screws on the brackets. There are four on each side then remove the brackets.

Disassembling the External Modules

Disassembling the HDD Module

1. Remove the four screws on HDD carrier.
2. Remove the hard disk drive from the carrier.
3. Disconnect the hard disk connector.

Disassembling the Floppy Disk Drive Module

1. Disconnect the floppy disk drive FFC.
2. Unscrew the two screws holding the bracket.
3. Unscrew the screw holding the bracket.

4. Remove the right and the left brackets.
5. Press the FDD latch with the fixture and remove the FDD panel.

Disassembling the DVD-ROM Module

1. Unscrew the two screws holding the support plate.
2. Then remove the support plate.

Troubleshooting

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test this model. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

1. Obtain the failing symptoms in as much detail as possible.
2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
3. If any problem occurs, you can perform visual inspection before you follow this chapter's instructions. You can check the following:
 - power cords are properly connected and secured;
 - there are no obvious shorts or opens;
 - there are no obviously burned or heated components;
 - all components appear normal.
4. Use the following table with the verified symptom to determine which page to go to.

Symptoms (Verified)	Go To
Power failure. (The power indicator does not go on or stay on.)	"Power System Check" on page 67.
POST does not complete. No beep or error codes are indicated.	"Power-On Self-Test (POST) Error Message" on page 69 "Undetermined Problems" on page 77
POST detects an error and displayed messages on screen.	"Error Message List" on page 70
The diagnostic test detected an error and displayed a FRU code.	"System Diagnostic Diskette" on page 45
Other symptoms (i.e. LCD display problems or others).	"Power-On Self-Test (POST) Error Message" on page 69
Symptoms cannot be re-created (intermittent problems).	Use the customer-reported symptoms and go to "Power-On Self-Test (POST) Error Message" on page 69 "Intermittent Problems" on page 76 "Undetermined Problems" on page 77

System Check Procedures

External Diskette Drive Check

Do the following to isolate the problem to a controller, driver, or diskette. A write-enabled, diagnostic diskette is required.

NOTE: Make sure that the diskette does not have more than one label attached to it. Multiple labels can cause damage to the drive or cause the drive to fail.

Do the following to select the test device. See “System Diagnostic Diskette” on page 45 for details.

1. Boot from the diagnostics diskette and start the diagnostics program (see “System Diagnostic Diskette” on page 45).
2. See if FDD Test is passed as the program runs to FDD Test.
3. Follow the instructions in the message window.

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

1. Reconnect the external diskette drive/DVD-ROM module.
2. Replace the external diskette drive/CD-ROM module.
3. Replace the main board.

External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

1. Boot from the diagnostics diskette and start the diagnostics program (refer to “System Diagnostic Diskette” on page 45).
2. See if CD-ROM Test is passed when the program runs to CD-ROM Test.
3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

1. Reconnect the external diskette drive/CD-ROM module.
2. Replace the external diskette drive/CD-ROM module.
3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test. See “System Diagnostic Diskette” on page 45 for details.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

1. Reconnect the keyboard cables.
2. Replace the keyboard.
3. Replace the main board.

The following auxiliary input devices are supported by this computer:

- Numeric keypad
- External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Memory Check

Memory errors might stop system operations, show error messages on the screen, or hang the system.

1. Boot from the diagnostics diskette and start the doagmpstotics program (please refer to “System Diagnostic Diskette” on page 45).
2. Go to the diagnostic memory in the test items.
3. Press F2 in the test items.
4. Follow the instructions in the message window.

NOTE: Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

Power System Check

To verify the symptom of the problem, power on the computer using each of the following power sources:

1. Remove the battery pack.
2. Connect the power adapter and check that power is supplied.
3. Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

If you suspect a power problem, see the appropriate power supply check in the following list:

- “Check the Battery Pack” on page 68
- “Check the Battery Pack” on page 68

Check the Battery Pack

To check the battery pack, do the following:

From Software:

1. Check out the Power Management in control Panel
2. In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
3. Repeat the steps 1 and 2, for both battery and adapter.
4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

1. Power off the computer.
2. Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground). See the following figure
3. If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Touchpad Check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

1. After rebooting, run Tracking Pad PS2 Mode Driver. For example, run Syn touch driver.
2. Run utility with the PS/2 mouse function and check if the mouse is working.
3. If the the PS/2 mouse does not work, then check if the main board to switch board FPC is connected O.K.
4. If the main board to switch board FPC is connected well, then check if the FCC on touch pad PCB connects properly.
5. If the FFC on touch pad PCB connects properly, then check if LS851 JP1 Pin6=5V are pulese. If yes, then replace switch board. If no, then go to next step.
6. Replace touch pad PCB.
7. If the touch pad still does not work, then replace FPC on Track Pad PCB.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see “Undetermined Problems” on page 77.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

Index of Error Messages

Error Code List

Error Codes	Error Messages
006	Equipment Configuration Error
010	Equipment Configuration Error
070	Real Time Clock Error 1
071	CMOS Battery Bad 4
072	CMOS Checksum Error 1
080	Battery Is Critical Low 1
110	Incorrect password specified, system halted 1

Error Message List

Error Messages	FRU/Action in Sequence
0200 Failure Fixed Disk	Hard disk error detected. Check to see if fixed disk is attached properly. Enter the BIOS Setup Utility and verify the hard disk is detected.
0211 Keyboard error	see "Keyboard or Auxiliary Input Device Check" on page 67.
0212 Keyboard Controller Failed	see "Keyboard or Auxiliary Input Device Check" on page 67. May require replacing the keyboard controller.
0213 Keyboard locked - Unlock key switch	Unlock the system to proceed.
0220 Monitor type does not match CMOS - Run SETUP	Display device mismatch. Enter the BIOS Setup Utility and verify the parameters (try loading the default settings); then save and restart the computer.
0230 Shadow RAM Failed at offset: nnnn	Shadow RAM test failed System board
0231 System RAM Failed at offset: nnnn	System RAM test failed System board
0232 Extended RAM Failed at offset: nnnn	Extended RAM test failed System board
0250 System battery is dead - Replace and run SETUP	CMOS clock battery needs to be replaced. Replace the battery and run BIOS Setup Utility to reconfigure system time, then reboot system.
0251 System CMOS checksum bad - Default configuration used	CMOS has been corrupted or modified incorrectly. Run BIOS Setup Utility and verify the parameters; then save and restart the computer. Check the system battery.
0260 System timer error	System timer test failed, and the system board needs to be repaired. Run BIOS Setup Utility to reconfigure system time, then reboot system. System board
0270 Real time clock error	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system. System board
0280 Previous boot incomplete - Default configuration used	Previous boot-up was not completed successfully. Enter the BIOS Setup Utility and verify the parameters (try loading the default settings); then save and restart the computer. RTC battery System board

Error Message List

Error Messages	FRU/Action in Sequence
0281 Memory size found by POST differed from CMOS	Run "Load Setup Defaults" in BIOS Setup Utility. System board
02B0 Diskette drive A/B error	Drive A: or B: is present but fails the BIOS POST diskette tests. Check the drive is defined with the proper diskette type in BIOS Setup Utility Check if the diskette drive is attached correctly. See "External Diskette Drive Check" on page 66.
02B2 Incorrect Drive A type - run SETUP	Type of floppy drive A: not correctly identified in Setup. System board
02D0 System cache error - Cache disabled	RAM cache failed and BIOS disabled the cache. On older boards, check the cache jumpers. You may have to replace the cache. System board
02F0 CPU ID	CPU socket number for Multi-Processor error. System board
02F4 EISA CMOS not writeable	System unable to write to EISA CMOS. System board
02F5 DMA Test Failed	System unable to write to DMA (Direct Memory Access) registers. System board
02F6 Software NMI Failed	System unable to generate software NMI (Non-Maskable Interrupt). System board
02F7 Fail-Safe Timer NMI Failed	Fail-Safe Timer takes too long. System board
<i>device</i> Address Conflict	Specific device has an address conflict. Enter the BIOS Setup Utility and verify the parameters (try loading the default settings); then save and restart the computer. RTC battery System board
Failing Bits: nnnn	Memory test failed. DIMM BIOS ROM System board
Invalid System Configuration Data	Error with NVRAM (CMOS) data. Enter the BIOS Setup Utility and verify the parameters (try loading the default settings); then save and restart your computer. System board
I/O device IRQ conflict	I/O device has IRQ (Interrupt Request) conflict. Enter the BIOS Setup Utility and verify the parameters (try loading the default settings); then save and restart the computer. RTC battery System board
Operating system not found	Operating system cannot be found on the boot device. Enter the BIOS Setup Utility and verify the parameters (try loading the default settings); then save and restart the computer. Recover hard disk. Reinstall the operating system.
Parity Check 1 nnnn	Parity error found on system bus. BIOS attempts to locate the address and display it on the screen. If it cannot locate the address, it displays.
Parity Check 2 nnnn	Parity error found on I/O bus. BIOS attempts to locate the address and display it on the screen. If it cannot locate the address, it displays .

Error Message List

No beep Error Messages	FRU/Action in Sequence
No beep, power-on indicator turns off and LCD is blank.	Power source (battery pack and power adapter). See "Power System Check" on page 67. Ensure every connector is connected tightly and correctly. Reconnect the DIMM. LED board. System board.
No beep, power-on indicator turns on and LCD is blank.	Power source (battery pack and power adapter). See "Power System Check" on page 67. Reconnect the LCD connector Hard disk drive LCD inverter ID LCD cable LCD Inverter LCD System board
No beep, power-on indicator turns on and LCD is blank. But you can see POST on an external CRT.	Reconnect the LCD connectors. LCD inverter ID LCD cable LCD inverter LCD System board
No beep, power-on indicator turns on and a blinking cursor shown on LCD during POST.	Ensure every connector is connected tightly and correctly. System board
No beep during POST but system runs correctly.	Speaker System board

Index of Symptom-to-FRU Error Message

LCD-Related Symptoms

Symptom / Error	Action in Sequence
LCD backlight doesn't work LCD is too dark LCD brightness cannot be adjusted LCD contrast cannot be adjusted	Enter BIOS Utility to execute "Load Setup Defaults" on Exit screen, then reboot system. Reconnect the LCD connectors. Keyboard (if contrast and brightness function key doesn't work). LCD inverter ID LCD cable LCD inverter LCD System board
Unreadable LCD screen Missing pels in characters Abnormal screen Wrong color displayed	Reconnect the LCD connector LCD inverter ID LCD cable LCD inverter LCD System board
LCD has extra horizontal or vertical lines displayed.	LCD inverter ID LCD inverter LCD cable LCD System board

Indicator-Related Symptoms

Symptom / Error	Action in Sequence
Indicator incorrectly remains off or on, but system runs correctly	Reconnect the inverter board Inverter board System board

Power-Related Symptoms

Symptom / Error	Action in Sequence
Power shuts down during operation	Power source (battery pack and power adapter). See "Power System Check" on page 67. Battery pack Power adapter Hard drive & battery connection board System board
The system doesn't power-on.	Power source (battery pack and power adapter). See "Power System Check" on page 67. Battery pack Power adapter Hard drive & battery connection board System board
The system doesn't power-off.	Power source (battery pack and power adapter). See "Power System Check" on page 67. Hold and press the power switch for more than 4 seconds. System board
Battery can't be charged	See "Check the Battery Pack" on page 68. Battery pack System board

PCMCIA-Related Symptoms

Symptom / Error	Action in Sequence
System cannot detect the PC Card (PCMCIA)	PCMCIA slot assembly System board
PCMCIA slot pin is damaged.	PCMCIA slot assembly

Memory-Related Symptoms

Symptom / Error	Action in Sequence
Memory count (size) appears different from actual size.	DIMM System board

Speaker-Related Symptoms

Symptom / Error	Action in Sequence
In Windows, multimedia programs, no sound comes from the computer.	Audio driver Speaker System board
Internal speakers make noise or emit no sound.	Speaker System board

Power Management-Related Symptoms

Symptom / Error	Action in Sequence
The system will not enter hibernation	Keyboard (if control is from the keyboard) Hard disk drive System board
The system doesn't enter hibernation mode and four short beeps every minute.	Press Fn+F4 and see if the computer enters hibernation mode. Touchpad Keyboard Hard disk connection board Hard disk drive System board
The system doesn't enter standby mode after closing the LCD	LCD cover switch System board
The system doesn't resume from hibernation mode.	Hard disk connection board Hard disk drive System board
The system doesn't resume from standby mode after opening the LCD.	LCD cover switch System board
Battery fuel gauge in Windows doesn't go higher than 90%.	Remove battery pack and let it cool for 2 hours. Refresh battery (continue use battery until power off, then charge battery). Battery pack System board
System hangs intermittently.	See "Thermal & Fan Utility" on page 45. Reconnect hard disk/CD-ROM drives. Hard disk connection board System board

Peripheral-Related Symptoms

Symptom / Error	Action in Sequence
System configuration does not match the installed devices.	Enter BIOS Setup Utility to execute "Load Setup defaults", then reboot system. Reconnect hard disk/CD-ROM/diskette drives.
External display does not work correctly.	Press Fn+F5, LCD/CRT/Both display switching See "System Diagnostic Diskette" on page 45. System board
USB does not work correctly	See "System Diagnostic Diskette" on page 45 System board
Print problems.	Ensure the "Parallel Port" in the "System Devices" of BIOS Setup Utility is set to Enabled. Onboard Devices Configuration Run printer self-test. Printer driver Printer cable Printer System Board

Keyboard/Touchpad-Related Symptoms

Symptom / Error	Action in Sequence
Keyboard (one or more keys) does not work.	Reconnect the keyboard cable. Keyboard System board
Touchpad does not work.	Reconnect touchpad cable. Touchpad board System board

Modem-Related Symptoms

Symptom / Error	Action in Sequence
Internal modem does not work correctly.	See "System Diagnostic Diskette" on page 45. Modem phone port modem combo board System board

NOTE: If you cannot find a symptom or an error in this list and the problem remains, see "Undetermined Problems" on page 77.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
2. If no error is detected, do not replace any FRU.
3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See “Power System Check” on page 67):

1. Power-off the computer.
2. Visually check them for damage. If any problems are found, replace the FRU.
3. Remove or disconnect all of the following devices:
 - Non-Acer devices
 - Printer, mouse, and other external devices
 - Battery pack
 - Hard disk drive
 - DIMM
 - CD-ROM/Diskette drive Module
 - PC Cards
4. Power-on the computer.
5. Determine if the problem has changed.
6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:
 - System board
 - LCD assembly

Index of AFlash BIOS Error Message

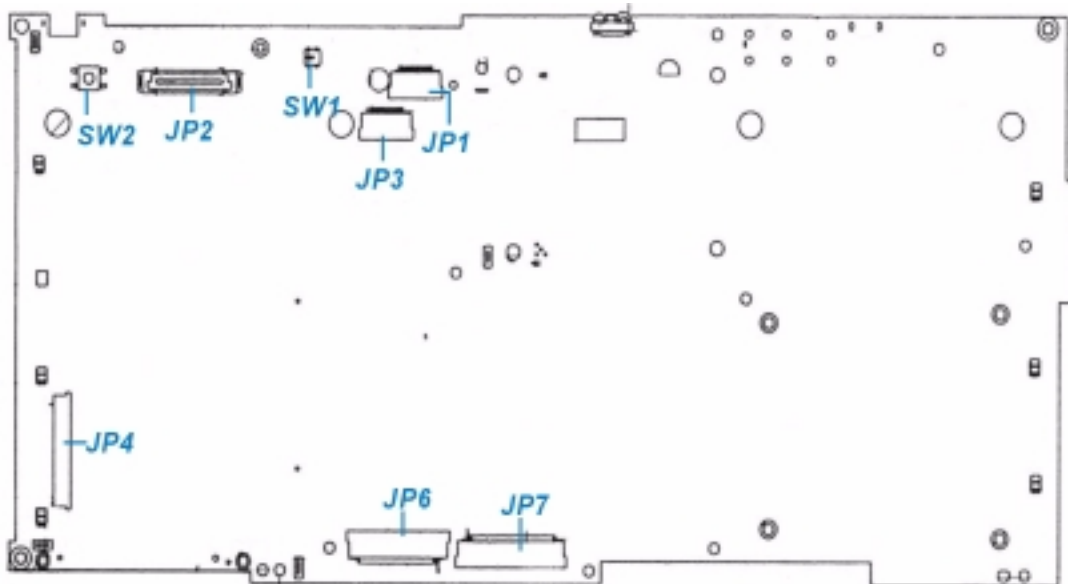

Error Message	Action in Sequence
Hardware Error	See "System Diagnostic Diskette" on page 45
VPD Checksum Error	Reboot the system and then retest with this diskette.
BIOS Update Program Error	Turn off the power and restart the system.
System Error	Make sure this AFlash BIOS diskette for this model.
Without AC adapter	make sure to connect AC adapter
Battery Low	make sure to install a highly charged battery, and reboot system.

Index of PQA Diagnostic Error Code, Message

Error Code	Message	Action in Sequence
16XXX	Backup battery error	Backup battery
01XXX	CPU or main board error	Reload BIOS default setting. System board
02XXX	Memory error	DIMM System board
03XXX	Keyboard error	Reset Keyboard Keyboard System board
04XXX	Video error	System board
05XXX	Parallel Port error	System board
06XXX	Serial port or main board error	System board
07XXX	Diskette drive error	Diskette drive System board
08XXX	Hard disk error	Reload BIOS default setting Hard disk System board
09XXX	CD-ROM error	Reset CD-ROM cable CD-ROM drive System board
10XXX	Co-processor error	System board
11XXX	Pointing device error	Reset Keyboard Keyboard System board
12XXX	Cache test error	System board

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of TravelMate α 550. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

Model Definition and Configuration

TravelMate α 550

1. Project Name: Compal project

2. Description

TravelMate a 550 uses either INTEL Pentium III processor or INTEL Celeron processor with the VIA chipset delivers a high performance and professional notebook platform solution.

Main memory is expandable to 640MB SDRAM. Powerful data storage with 1.44 MB floppy drive, one E-IDE hard disk and one internal optical drive. As to display, in addition to 14.1/15.0 TFT LCD, TravelMate a 550 also has AGP 4X support and is suitable LCD and CRT display plus S-video (NTSC/PAL) output, DualView support. Audio ports for speaker/headphone-out jack and microphone-in devices provide the user the best quality as he employs the devices above.

Main Features

- Intel® Pentium™ III or Intel® Celeron™ processor with on-die level 2 cache
- 128 MB memory onboard and one memory upgrade slot
- Large LCD display with adjustable video memory
- High-capacity, Enhanced-IDE hard disk
- Lithium-Ion main battery pack
- Power management system
- DualView capability
- Simultaneous LCD and CRT display

Test Compatible Components

This computer's compatibility is tested and verified by Acer's internal testing department. All of its system functions are tested under Windows XP environment.

Refer to the following lists for components, adapter cards, and peripherals which have passed these tests.

Regarding configuration, combination and test procedures, please refer to the TravelMate α 550 Compatibility Test Report released by the Acer Mobile System Testing Department.

Online Support Information

This section describes online technical support services available to help you repair your Acer Systems.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website. However some information sources will require a user i.d. and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

- Service guides for all models
- User's manuals
- Training materials
- Main manuals
- Bios updates
- Software utilities
- Schematics
- Spare parts lists
- Chips
- TABs (Technical Announcement Bulletin)

The service repair section provides you with downloadable information on:

- Troubleshooting guides
- Tooling box information
- Repair instructions for specific models
- Basic repair guidelines
- Debug cards for Acer's latest models

For these purposes, we have included an Acrobat File to facilitate the problem-free downloading of our technical material.

Also contained on this website are:

- Detailed information on Acer's International Traveler's Warranty (ITW)
- Returned material authorization procedures
- An overview of all the support services we offer, accompanied by a list of telephone, fax and email contacts for all your technical queries.

We are always looking for ways to optimize and improve our services, so if you have any suggestions or comments, please do not hesitate to communicate these to us.
